

The Essential Package of Health Services and Health Benefit Plans in Pakistan

About the health benefit plan crosswalk analysis

An Essential Package of Health Services (EPHS) is a broad policy statement that identifies the services that a government has prioritized. The government seeks to ensure that these essential services reach the population equitably. A health benefit plan (HBP) specifies an explicit set of services and the cost-sharing requirements for beneficiaries to access those services.

In 2015, the USAID-funded Health Finance and Governance (HFG) project completed a landscape analysis of the EPHS in the 24 USAID priority countries for Ending Preventable Child and Maternal Deaths (EPCMD).¹ The analysis found that the government in most of the countries intends for the public and/or private not-for-profit facilities in the country to deliver the services in the EPHS. It also showed that several governments were implementing major HBPs (such as social health insurance schemes) as a primary strategy for moving toward universal health coverage. Yet it remained unclear how the EPHSs and HBPs are formulated, how they are modified, and the extent to which they overlap.

HFG conducted a second landscape analysis in 2016 to identify existing HBPs in the countries, and the services they cover. It then did a crosswalk analysis – a mapping of items on one list to equivalent items on another list – of the services specified in the country’s EPHS and those identified in an HBP. This companion analysis to the EPHS country snapshot documented the degree of alignment between the EPHS and HBP.

This brief presents HFG’s findings and observations for policymakers and program managers seeking to promote alignment of services in the EPHS with services covered in the HBP and move toward universal health coverage.

Health benefit plans in Pakistan

Prime Minister's National Health Insurance Program

The Prime Minister's National Health Insurance Program (NHIP) launched in January 2016 and represents a national effort to advance toward universal health coverage. The Pakistani government collaborates with State Life, a private insurer, to implement the NHIP. The premium is set at Rs 1,299 per family per year, though the government subsidizes the premiums of families with a daily income of less than Rs 200 (US\$2). The NHIP provides benefits of up to Rs 50,000 (US\$500) for general treatment and Rs 300,000 (US\$3,000) for life-threatening conditions. The HBP is very detailed and lists over 1,000 services, most of which are surgical procedures.

Members can access health services at public and private health facilities at the primary, secondary, and tertiary level. Enrollment in the scheme is voluntary. With an initial budget of US\$86 million, the NHIP currently reaches an estimated 3 million families in 23 districts across Pakistan. The Pakistani government aims to eventually cover 22 million households but has not specified a timeframe for its scale.

Waseela-e-Sehat (Benazir Income Support Program)

The Government of Pakistan had established the Benazir Income Support Program (BISP) in 2010 to increase social assistance to indigent communities. Pakistan's Social Protection Development Project provided subsidies for BISP. The BISP scheme targeted mothers and other women, who comprised 67 percent of the BISP's enrollees. Though it never expanded beyond its pilot phase, the BISP charged a premium of Rs 1,030 (US\$9.80) per family per year and provided benefits up to Rs 25,000 (US\$238.61) annually per family. The program used a household demographic survey to identify indigent households eligible for the program.

In July 2016, Pakistan news media reported that the BISP program had been shut down due to operational and management issues. The NHIP is now the country's primary insurance scheme for Pakistan's indigent population.

Methodology

HFG identified all major HBPs operating in the country through a desk review of public domain sources found through web-based searches, including: government strategy documents, studies and reports, peer-reviewed journal articles, news articles, and gray literature. A list of sources reviewed is at the end of this document. We collected information across all 24 countries using a common template. We analyzed the HBPs operating in the country which:

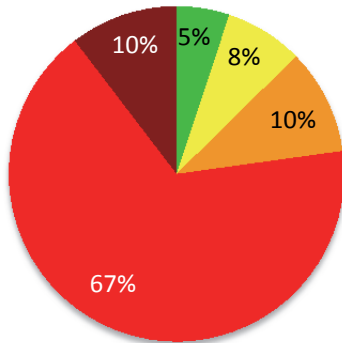

- ▶ are fully or partially publicly financed.
- ▶ employ a risk-pooling mechanism to provide financial protection to beneficiaries when they access covered services.

HFG determined whether the HBP had an explicit, published list of covered services. We compared services included in the government's EPHS to those in the HBP using Microsoft Excel. To indicate how each service included in the EPHS relates to those in the HBP, we established a color-coded system as follows:

TABLE 1: CLASSIFICATION SYSTEM FOR THE CROSSWALK ANALYSIS

Service included in EPHS matches service included in HBP	
Service included in HBP fits within a broader category of services included in EPHS	Service included in EPHS fits within a broader category of services included in HBP
Service included in EPHS but not included in HBP	Service included in HBP but not included in EPHS
Service explicitly excluded from EPHS	Service explicitly excluded from HBP

Main observations from the crosswalk

- ▶ The NHIP's HBP is primarily a list of surgical procedures. Its overlap with the EPHS is limited.

- ▶ Though the HBP does include some child surgical procedures such as cleft palate repair, it does not specify any basic child health services like immunization.
- ▶ The HBP specifies only IUDs and tubal ligations among family planning services.
- ▶ There is some overlap between the EPHS and HBP for neonatal care, communicable diseases, and delivery services.

The detailed crosswalk is shown below. The tables present the health services essentially as written in the official health policy documents, although HFG has edited them to maintain a consistent style across this series of country briefs.

TABLE 2: NHIP CROSSWALK ANALYSIS

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Family Planning and Reproductive Health		
Female sterilization (tubal ligation)	Service included in EPHS matches service included in HBP	Conventional tubectomy
Male sterilization (vasectomy)	Service included in EPHS matches service included in HBP	Vasectomy
Postnatal care - provide contraceptives: Injectables and IUDs	Service included in HBP fits within a broader category of services included in EPHS	Insertion of IUD
Provision of contraceptives: Oral pills, emergency contraceptive pill, injections, insert IUDs		
Referral to appropriate providers and facilities for intra-uterine devices (IUDs) and contraceptive surgery; other conditions and ailments		
Maternal and child health care, including family planning		
Family planning services: Clinical examination		
Postnatal care - female sterilization (tubal ligation)	Service included in HBP fits within a broader category of services included in EPHS	Conventional tubectomy
Promotion of FP methods; emphasizing spacing interventions	Service included in EPHS but not included in HBP	

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Health promotion and education services - family planning	Service included in EPHS but not included in HBP	
Health promotion and education services - birth spacing	Service included in EPHS but not included in HBP	
Health promotion and education - STIs including HIV/AIDS	Service included in EPHS but not included in HBP	
Antenatal care - vaginal bleeding, including post abortion care in early and late pregnancy as per protocol	Service included in EPHS but not included in HBP	
Postnatal care - counselling on family planning specifically spacing for at least 2 years	Service included in EPHS but not included in HBP	
Postnatal care - provide contraceptives: condoms and pills	Service included in EPHS but not included in HBP	
Counselling on family planning methods to enhance CPR (educate & motivate for FP, help make informed choice, suggest alternative in case of side effects, correct misconceptions)	Service included in EPHS but not included in HBP	
Education about modern methods: Condoms, pills, injections, IUDs, implants, tubal ligation, vasectomy	Service included in EPHS but not included in HBP	
Manage side effects and problems with use of family planning methods	Service included in EPHS but not included in HBP	
Refer infertile couples to hospital	Service included in EPHS but not included in HBP	
STIs: History	Service included in EPHS but not included in HBP	
STIs: Examination	Service included in EPHS but not included in HBP	
STIs: Laboratory	Service included in EPHS but not included in HBP	
Syndromic management of STIs	Service included in EPHS but not included in HBP	
Pregnancy test kit	Service included in EPHS but not included in HBP	
	Service included in HBP but not included in EPHS	Vasovasostomy
	Service included in HBP but not included in EPHS	Exploration of epididymis (Unsuccessful vasovasostomy)
	Service included in HBP but not included in EPHS	Ablation of endometrium
	Service included in HBP but not included in EPHS	Bartholin cyst and abscess

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
	Service included in HBP but not included in EPHS	Cyst-Labial and vaginal
	Service included in HBP but not included in EPHS	Hysterectomy
	Service included in HBP but not included in EPHS	Fimbriolysis
	Service included in HBP but not included in EPHS	Hymenectomy & Repair of Hymen
	Service included in HBP but not included in EPHS	Malignant ovarian
	Service included in HBP but not included in EPHS	Other tubal and vaginal surgeries (see HBP for full list)
Malaria		
Treatment of uncomplicated case	Service included in HBP fits within a broader category of services included in EPHS	Other parasitologically confirmed malaria
Treatment of complicated case	Service included in HBP fits within a broader category of services included in EPHS	Plasmodium falciparum malaria
		Plasmodium malariae malaria
		Plasmodium vivax malaria
		Unspecified malaria
Health promotion and education - malaria/dengue	Service included in EPHS but not included in HBP	
Health education: Cleanliness of the surroundings, netting windows and doors, use bed nets	Service included in EPHS but not included in HBP	
Clinical diagnosis	Service included in EPHS but not included in HBP	
Laboratory diagnosis	Service included in EPHS but not included in HBP	
Malaria parasite smear (MPS)	Service included in EPHS but not included in HBP	

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Tuberculosis		
Treatment of registered/diagnosed cases	Service included in HBP fits within a broader category of services included in EPHS	Respiratory tuberculosis, bacteriologically and histologically confirmed
Health promotion and education - tuberculosis	Service included in EPHS but not included in HBP	
Health education: Identify suspects, get sputum test done, TB is curable, where TB services are available	Service included in EPHS but not included in HBP	
Sputum smear examination	Service included in EPHS but not included in HBP	
X-Ray for smear negative cases	Service included in EPHS but not included in HBP	
Participate in TB-DOTS (directly observed treatment, short-course), including recording & reporting	Service included in EPHS but not included in HBP	
Screening/referral of contacts	Service included in EPHS but not included in HBP	
Ziehl-Nielsen staining for acid fast bacilli (AFB)	Service included in EPHS but not included in HBP	
Direct smear for AFB	Service included in EPHS but not included in HBP	
HIV/AIDS		
Health education on: Using safe syringes/blood, having safe sex, how AIDS is transmitted and how it is not transmitted	Service included in EPHS but not included in HBP	
Suspicion/identification and referral	Service included in EPHS but not included in HBP	
HIV test	Service included in EPHS but not included in HBP	
Health promotion and education - STIs including HIV/AIDS	Service included in EPHS but not included in HBP	
	Service included in HBP but not included in EPHS	Tertiary Coverage - HIV complications

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Maternal Health		
Perform manual removal of placenta	Service included in EPHS matches service included in HBP	Manual removal of placenta
Conduct normal delivery	Service included in EPHS matches service included in HBP	Normal delivery
Caesarean section	Service included in EPHS matches service included in HBP	Caesarean delivery
		Lower segment caesarean section
Conduct normal delivery	Service included in HBP fits within a broader category of services included in EPHS	Normal delivery with episiotomy and repair
Conduct assisted vaginal delivery – MVA (manual vacuum aspiration), Forceps		Low forceps
Conduct assisted vaginal delivery - MVA, Forceps		Low mid cavity forceps
Perform removal of retained products (MVA, Misoprostol, without general anesthesia); referral	Service included in HBP fits within a broader category of services included in EPHS	D&C (dilatation & curettage)
Antenatal services - hypertension of pregnancy	Service included in HBP fits within a broader category of services included in EPHS	Gestational (pregnancy induced) hypertension with significant proteinuria
Postnatal care - female sterilization (tubal ligation)	Service included in HBP fits within a broader category of services included in EPHS	Conventional tubectomy
Postnatal care - provide contraceptives: Injectables and IUDs	Service included in HBP fits within a broader category of services included in EPHS	Insertion of IUD Device
Maternal and child health care, including family planning		
Perform assisted vaginal delivery (only if WMO is present)*	Service included in EPHS fits within a broader category of services included in HBP	Normal Delivery
Caesarean section	Service included in EPHS fits within a broader category of services included in HBP	Caesarean hysterectomy
Prenatal services: Identify/register pregnant women; provide antenatal care (ANC); assess nutritional status and give appropriate advice/treatment; manage minor discomforts and infections; refer for immunization, danger signs etc.; guide/facilitate birth preparation plan, birth spacing	Service included in EPHS but not included in HBP	

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Intra-natal services: Identify/monitor labor; ensure clean/safe delivery; physical and emotional support; identify/refer for danger signs	Service included in EPHS but not included in HBP	
Post-natal services: Immediate postnatal care and following 6 weeks; breast feeding; identify/refer for danger signs; educate on feeding, weaning, immunization, birth spacing, provide FP supplies	Service included in EPHS but not included in HBP	
Antenatal, intranatal, and postnatal services	Service included in EPHS but not included in HBP	
Administer parenteral antibiotics	Service included in EPHS but not included in HBP	
Administer uterotonic drugs (parenteral oxytocin, ergometrine, misoprostol)	Service included in EPHS but not included in HBP	
Administer parenteral anticonvulsants for preeclampsia and eclampsia (Magnesium sulphate, diazepam)	Service included in EPHS but not included in HBP	
Birth preparedness & complication readiness	Service included in EPHS but not included in HBP	
Mother's nutrition & rest	Service included in EPHS but not included in HBP	
Post-partum care	Service included in EPHS but not included in HBP	
Nutrition of pregnant lactating women	Service included in EPHS but not included in HBP	
Screening malnutrition in pregnant and lactating women	Service included in EPHS but not included in HBP	
Iron supplementation for pregnant, lactating women	Service included in EPHS but not included in HBP	
Folic acid supplementation for pregnant, lactating women	Service included in EPHS but not included in HBP	
Iron tablets for women of child bearing age	Service included in EPHS but not included in HBP	
Identify pregnant women in the community	Service included in EPHS but not included in HBP	
Persuade and register pregnant women in the community to receive antenatal care (ANC)	Service included in EPHS but not included in HBP	

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Diagnosis of pregnancy - history, examination, laboratory	Service included in EPHS but not included in HBP	
Antenatal visits - fundal height	Service included in EPHS but not included in HBP	
Antenatal visits - maternal weight	Service included in EPHS but not included in HBP	
Antenatal visits - blood pressure (BP) measurement	Service included in EPHS but not included in HBP	
Antenatal visits - tetanus immunization	Service included in EPHS but not included in HBP	
Antenatal visits - iron/folic acid supplementation	Service included in EPHS but not included in HBP	
Antenatal visits - goitre	Service included in EPHS but not included in HBP	
Antenatal visits - oedema	Service included in EPHS but not included in HBP	
Antenatal visits - urine for albumin/sugar	Service included in EPHS but not included in HBP	
Birth preparedness plan or emergencies: Identifying SBA*/referral hospital for delivery, arranging money, identifying transport, identifying blood donor, clean delivery kit for home delivery	Service included in EPHS but not included in HBP	
Antenatal care - treatment of vaginal infections (bacterial vaginosis, trichomoniasis, moniliasis)	Service included in EPHS but not included in HBP	
Antenatal care - management of anemia, history and examination	Service included in EPHS but not included in HBP	
Antenatal care - management of anemia, hemoglobin estimation	Service included in EPHS but not included in HBP	
Antenatal care - management of anemia, treatment	Service included in EPHS but not included in HBP	
Antenatal services - management of inter-current illness	Service included in EPHS but not included in HBP	
Antenatal services - worm infestation identification and deworming	Service included in EPHS but not included in HBP	
Antenatal services - prevention of malaria by promoting use of bed nets	Service included in EPHS but not included in HBP	
Antenatal services - treatment of malaria	Service included in EPHS but not included in HBP	
Antenatal services - treatment of urinary tract infections	Service included in EPHS but not included in HBP	

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Antenatal services - management of complication pre-eclampsia/eclampsia	Service included in EPHS but not included in HBP	
Antenatal services - incomplete miscarriage/abortion	Service included in EPHS but not included in HBP	
Antenatal services - diabetes mellitus	Service included in EPHS but not included in HBP	
Antenatal services - ectopic pregnancy	Service included in EPHS but not included in HBP	
Antenatal services - syndromic management of sexually transmitted infections	Service included in EPHS but not included in HBP	
Antenatal services - treatment of Vitamin A deficiency (in the last trimester, if night blindness appears)	Service included in EPHS but not included in HBP	
Antenatal services - management of shock	Service included in EPHS but not included in HBP	
Antenatal services - ultrasound	Service included in EPHS but not included in HBP	
Identify true labor and monitor progression of labor partograph	Service included in EPHS but not included in HBP	
Danger signs in the first, second, and third stages of labor	Service included in EPHS but not included in HBP	
Prepare environment and materials following infection control protocols	Service included in EPHS but not included in HBP	
Identify fetal malposition	Service included in EPHS but not included in HBP	
External cephalic version	Service included in EPHS but not included in HBP	
Identify and refer high risk pregnancy	Service included in EPHS but not included in HBP	
Provide safe delivery kit	Service included in EPHS but not included in HBP	
Administer intravenous (IV) fluids	Service included in EPHS but not included in HBP	
Administer parenteral Oxytocin	Service included in EPHS but not included in HBP	
Administer parenteral anticonvulsants	Service included in EPHS but not included in HBP	

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Transfuse safe blood	Service included in EPHS but not included in HBP	
Prevention of postpartum hemorrhage bimanual compression of uterus	Service included in EPHS but not included in HBP	
Recognition and repair/suturing of 1st and 2nd degree vaginal tears	Service included in EPHS but not included in HBP	
Recognition and referral to hospital for 3rd degree vaginal & cervical tears	Service included in EPHS but not included in HBP	
Suturing of 3rd degree vaginal & cervical tears	Service included in EPHS but not included in HBP	
Follow all steps of active management of third stage of labor	Service included in EPHS but not included in HBP	
Removal of retained products	Service included in EPHS but not included in HBP	
(Manual vacuum extraction/evacuation and Curettage)	Service included in EPHS but not included in HBP	
Management of prolapsed cord	Service included in EPHS but not included in HBP	
Management of shoulder dystocia	Service included in EPHS but not included in HBP	
Administer ergometrine	Service included in EPHS but not included in HBP	
Appropriate disposal of placenta and other wastes	Service included in EPHS but not included in HBP	
Postnatal care - breast examination of breastfeeding management	Service included in EPHS but not included in HBP	
Postnatal care - iron and folic acid supplementation	Service included in EPHS but not included in HBP	
Management of postpartum hemorrhage - diagnosis on history and examination	Service included in EPHS but not included in HBP	
Management of postpartum hemorrhage - first aid, supportive management and referral	Service included in EPHS but not included in HBP	
Management of postpartum hemorrhage - treatment	Service included in EPHS but not included in HBP	
Management of postpartum hemorrhage - I/V fluids	Service included in EPHS but not included in HBP	
Management of postpartum hemorrhage - blood transfusion	Service included in EPHS but not included in HBP	
Management of puerperal sepsis - Identification/diagnosis on history and examination	Service included in EPHS but not included in HBP	

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Management of puerperal sepsis - supportive management and referral	Service included in EPHS but not included in HBP	
Management of puerperal sepsis - laboratory	Service included in EPHS but not included in HBP	
Management of puerperal sepsis - parenteral antibiotics	Service included in EPHS but not included in HBP	
Management of puerperal sepsis - oral antibiotics	Service included in EPHS but not included in HBP	
Postnatal care - oral antibiotics	Service included in EPHS but not included in HBP	
Postnatal care - register births and deaths	Service included in EPHS but not included in HBP	
Support and counseling for ante-partum and post-partum depression	Service included in EPHS but not included in HBP	
Referral for post-partum depression	Service included in EPHS but not included in HBP	
Antenatal care - vaginal bleeding, including post abortion care in early and late pregnancy as per protocol	Service included in EPHS but not included in HBP	
Postnatal care - Counselling on family planning specifically spacing for at least 2 years	Service included in EPHS but not included in HBP	
Postnatal care - provide contraceptives: Condoms and pills	Service included in EPHS but not included in HBP	
Community Based Midwifery Care: Assess community, build linkages; report/interact with Lady Health Supervisor (LHS); LHWs*, WMOs*; Lady Health Visitor (LHV).	Service included in EPHS but not included in HBP	
Depression/post-partum depression: Drug abuse	Service included in EPHS but not included in HBP	
Depression/post-partum depression: Treatment of epilepsy; referral for advanced management	Service included in EPHS but not included in HBP	
	Service included in HBP but not included in EPHS	Destructive operation
	Service included in HBP but not included in EPHS	Mastectomy
	Service included in HBP but not included in EPHS	Breast-Excision

*Acronym is undefined

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
	Service included in HBP but not included in EPHS	Breast Lump-Left-Excision
	Service included in HBP but not included in EPHS	Breast Lump-Right-Excision
	Service included in HBP but not included in EPHS	Breast Mass-Excision
Newborn Health		
Neonatal jaundice: History and examination, laboratory, management at home, treatment of severe cases, preventive education (continued feeding, no extra fluids, no medication, recognizing intensity, taking action)	Service included in EPHS fits within a broader category of services included in HBP	Neonatal jaundice from other and unspecified causes Neonatal jaundice due to other excessive hemolysis
Phototherapy for jaundice		
Perform neonatal resuscitation (with bag and mask)	Service included in EPHS fits within a broader category of services included in HBP	Advanced package for neonatal Care (low birth weight babies <1500 gm and all babies admitted with complications like meningitis, severe respiratory distress, shock, coma, convulsions or encephalopathy, jaundice requiring exchange transfusion, necrotizing enterocolitis)
Neonatal resuscitation		
Clean airway, assesses the baby's breathing and color, decide if the baby needs resuscitation, and resuscitate if required		
Management of asphyxia		
Neonatal sepsis: History and examination, laboratory, treatment		
Managing low body weight (LBW) baby		
Support for LBW babies		
Monitoring of newborns after resuscitation, administration of medicines		
Monitoring for respiratory distress including apnea, grunting, rapid breathing		
Screening and management for Infections/sepsis		
Oxygen administration; and oxygenation monitoring		
Newborn care: Manage immediate care, minor disorders, identify/refer for danger signs; educate mothers on clean cord care, eye care, warmth, immunization, nutrition, breast feeding, clothing and hygiene	Service included in EPHS but not included in HBP	
Newborn care and feeding	Service included in EPHS but not included in HBP	

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Exclusive breast feeding up to 6 months	Service included in EPHS but not included in HBP	
Infant and young child nutrition	Service included in EPHS but not included in HBP	
Weaning after 6 months of age under Infant and Young Child Feeding (IYCF) guidelines	Service included in EPHS but not included in HBP	
Initiating newborn breastfeeding within an hour of birth	Service included in EPHS but not included in HBP	
For infants, nutritionally adequate and safe complementary foods starting at 6 months, while continuing breastfeeding up to two years	Service included in EPHS but not included in HBP	
Involve community in IYCF activities	Service included in EPHS but not included in HBP	
Prevention and management of malnutrition - support and promote exclusive breastfeeding	Service included in EPHS but not included in HBP	
Promotion of appropriate complementary feeding from 6 months	Service included in EPHS but not included in HBP	
Health education/promotion on handwashing, cord care, keeping the baby warm, early initiation of breast feeding, exclusive breastfeeding, recognizing danger signs/intensity and taking action, completing immunization	Service included in EPHS but not included in HBP	
Dry and stimulate the baby	Service included in EPHS but not included in HBP	
Tie/clamp and cut the cord	Service included in EPHS but not included in HBP	
Avoid hypothermia: Keeping baby close to mother, cover both mother and baby with a sheet/blanket, cover the baby's head with a cloth	Service included in EPHS but not included in HBP	
Recognizing danger signs	Service included in EPHS but not included in HBP	
Eye care including prevention of ophthalmia neonatorum within an hour of birth	Service included in EPHS but not included in HBP	
Identification of the baby	Service included in EPHS but not included in HBP	
Counselling of mother before transfer to post-partum area/before discharge/before provider leaves: on all infant care health education/promotion areas mentioned above and on post-partum maternal care	Service included in EPHS but not included in HBP	
Cord care using 4% CHX (Chlorhexidine)	Service included in EPHS but not included in HBP	

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Neonatal tetanus: Preventive education on clean cord cutting, cord care, tetanus toxoid, diagnosis on history and examination, treatment	Service included in EPHS but not included in HBP	
Conduct comprehensive examination of the mother and newborn	Service included in EPHS but not included in HBP	
Respiration, color and temperature	Service included in EPHS but not included in HBP	
Checking/reties cord	Service included in EPHS but not included in HBP	
Checking danger signs, referral if needed after giving first dose of antibiotic	Service included in EPHS but not included in HBP	
Checking/advising breastfeeding	Service included in EPHS but not included in HBP	
Observing breastfeeding including attachment at the breast for at least 5 min	Service included in EPHS but not included in HBP	
Advising mother to inform if she notes any problem	Service included in EPHS but not included in HBP	
Check posture and tone, heart rate, activity, skin, head, eyes, mouth, chest, abdomen, back and spine, anus, and genital organs	Service included in EPHS but not included in HBP	
Newborn immunization	Service included in EPHS but not included in HBP	
Give vitamin K 1mg IM	Service included in EPHS but not included in HBP	
Monitoring the baby during first 6 hours of delivery (every 15m for first 3 hours, every 30m in the third hour and every hour in the next three hours)	Service included in EPHS but not included in HBP	
Teach and counsel mother/family about: Recognizing danger signs and taking appropriate actions if they occur	Service included in EPHS but not included in HBP	
Teach and counsel mother/family about: Hand washing with soap	Service included in EPHS but not included in HBP	
Teach and counsel mother/family about: Keep cord clean and dry	Service included in EPHS but not included in HBP	
Teach and counsel mother/family about: cord care including not applying anything	Service included in EPHS but not included in HBP	
Exclusive breastfeeding for 6 months, including colostrum	Service included in EPHS but not included in HBP	
Teach and counsel mother/family about: Keeping the baby warm	Service included in EPHS but not included in HBP	

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Teach and counsel mother/family about: Completing immunization	Service included in EPHS but not included in HBP	
Teach and counsel mother/family about: Breastfeeding of low body weight baby every 2 to 2 1/2 hours	Service included in EPHS but not included in HBP	
Assessment and screening of newborns	Service included in EPHS but not included in HBP	
Warmth by keeping baby close to mother	Service included in EPHS but not included in HBP	
Breastfeeding support	Service included in EPHS but not included in HBP	
Newborn feeding	Service included in EPHS but not included in HBP	
Support for premature babies at 28 weeks	Service included in EPHS but not included in HBP	
Support for small for gestational age babies	Service included in EPHS but not included in HBP	
Cardiac and blood pressure monitoring of newborns	Service included in EPHS but not included in HBP	
Management of macrosomia (>4500 g) and hypoglycemia	Service included in EPHS but not included in HBP	
IV care and support	Service included in EPHS but not included in HBP	
Referral and transport (in incubator) for complications, congenital malformations, etc.	Service included in EPHS but not included in HBP	
Disability prevention and rehabilitation services: Health education on early examination of newborns	Service included in EPHS but not included in HBP	
	Service included in HBP but not included in EPHS	Pyloric Stenosis (Ramstedt surgery)
	Service included in HBP but not included in EPHS	Hemangioma-Excision
	Service included in HBP but not included in EPHS	Meningococcal Occipital

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Child Health (1-5 years)		
Immunization against major infectious diseases	Service included in EPHS but not included in HBP	
Completing immunization	Service included in EPHS but not included in HBP	
Managing diarrhea at home	Service included in EPHS but not included in HBP	
Growth/development monitoring	Service included in EPHS but not included in HBP	
Accident prevention	Service included in EPHS but not included in HBP	
Growth monitoring	Service included in EPHS but not included in HBP	
Iron supplementation for children 6 months to 5 years	Service included in EPHS but not included in HBP	
Deworming of children under 5 years	Service included in EPHS but not included in HBP	
Treatment of severe acute malnutrition/ moderate acute malnutrition (SAM/MAM) children	Service included in EPHS but not included in HBP	
Treatment of SAM children with complications	Service included in EPHS but not included in HBP	
Infant and child care services: Health promotion/education on importance of immunization, repeated Polio delays	Service included in EPHS but not included in HBP	
Infant and child care services: Storage of vaccines	Service included in EPHS but not included in HBP	
Infant and child care services: Routine immunization	Service included in EPHS but not included in HBP	
Infant and child care services: Campaigns/ national immunization days (NIDs)	Service included in EPHS but not included in HBP	
Infant and child care services: disease surveillance and case reporting	Service included in EPHS but not included in HBP	
Health education for ARI: Increasing fluids, continue feeding, cleanliness	Service included in EPHS but not included in HBP	
Child with cough/cold (no signs of pneumonia)	Service included in EPHS but not included in HBP	
Child with fast breathing (pneumonia)	Service included in EPHS but not included in HBP	
Child with severe pneumonia	Service included in EPHS but not included in HBP	

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Child with very severe disease	Service included in EPHS but not included in HBP	
Child with wheeze	Service included in EPHS but not included in HBP	
Child with ear infection	Service included in EPHS but not included in HBP	
Health education on diarrhea/oral rehydration therapy (ORT), how to mix oral rehydration solution, increasing fluids, continue feeding, handwashing, identifying danger signs and taking timely actions	Service included in EPHS but not included in HBP	
Management of diarrhea: With no dehydration	Service included in EPHS but not included in HBP	
Management of diarrhea: Some dehydration	Service included in EPHS but not included in HBP	
Management of diarrhea: Administer Zinc Sulphate	Service included in EPHS but not included in HBP	
Management of diarrhea: With additional problems: diarrhea > 14 days, with severe malnutrition, fever > 38C	Service included in EPHS but not included in HBP	
Management of fever: History and examination	Service included in EPHS but not included in HBP	
Management of fever: Laboratory	Service included in EPHS but not included in HBP	
Management of fever: Treatment	Service included in EPHS but not included in HBP	
Management of fever: Refer persistent fever of more than 24 hours; fever > 102F	Service included in EPHS but not included in HBP	
Management of severely ill child	Service included in EPHS but not included in HBP	
Regular and timely immunization	Service included in EPHS but not included in HBP	
Giving polio drops on all neglected infectious diseases (NIDs)	Service included in EPHS but not included in HBP	
Vaccinating out-of-schedule child	Service included in EPHS but not included in HBP	
Assess immunization status and refer in cases of complications	Service included in EPHS but not included in HBP	
Routine immunization	Service included in EPHS but not included in HBP	

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Storage of vaccines	Service included in EPHS but not included in HBP	
Participate in campaigns (NIDs)	Service included in EPHS but not included in HBP	
Record keeping/updating immunization cards	Service included in EPHS but not included in HBP	
Disease surveillance and case reporting	Service included in EPHS but not included in HBP	
Routine immunization schedule for children and pregnant women: At birth - BCG, OPV0, Hepatitis B	Service included in EPHS but not included in HBP	
Routine immunization schedule for children: 6 weeks - Pentavalent-I, OPV-I, Pneumococcal	Service included in EPHS but not included in HBP	
Routine immunization schedule for children : 10 weeks - Pentavalent-II, OPV II, Pneumococcal	Service included in EPHS but not included in HBP	
Routine immunization schedule for children: 14 weeks - Pentavalent-III, OPV-III, Pneumococcal	Service included in EPHS but not included in HBP	
Routine immunization schedule for children: 9 months – Measles-I	Service included in EPHS but not included in HBP	
Routine immunization schedule for children: 15 months - Measles-II	Service included in EPHS but not included in HBP	
Routine immunization schedule for children: For pregnant women: TT1, TT2, TT3, TT4, TT5	Service included in EPHS but not included in HBP	
Immunization including establishing vaccination post	Service included in EPHS but not included in HBP	
Prevention and management of malnutrition - community level screening of women and children	Service included in EPHS but not included in HBP	
	Service included in HBP but not included in EPHS	Cleft palate repair
	Service included in HBP but not included in EPHS	Epiphyseal stimulation
	Service included in HBP but not included in EPHS	Hematoma (Child irritable subdural)
	Service included in HBP but not included in EPHS	Surgeries to repair birth defects (full list in HBP)

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Other Communicable Diseases		
Acute diarrhea Chronic diarrhea Management of diarrhea: With no dehydration Management of diarrhea: Some dehydration Management of diarrhea: Administer zinc sulphate Management of Diarrhea: With additional problems: Diarrhea > 14 days, with severe malnutrition, fever > 38°C Health education on Diarrhea/ORT, how to mix ORS, increasing fluids, continue feeding, handwashing, identifying danger signs and taking timely actions Managing diarrhea at home	Service included in EPHS matches service included in HBP	Diarrhea and gastroenteritis of presumed infectious origin
Pneumonia	Service included in EPHS matches service included in HBP	Pneumonia, organism unspecified Pneumonia due to Haemophilus influenzae Pneumonia due to Streptococcus pneumoniae Pneumonia due to other infectious organisms, not elsewhere classified Pneumonia in diseases classified elsewhere Bacterial pneumonia, not elsewhere classified Viral pneumonia, not elsewhere classified
Hepatitis B and C: Health education on transmission Hepatitis B and C: History Hepatitis B and C: Examination Hepatitis B and C: Laboratory Hepatitis B and C: Treatment Diagnostic services: Hepatitis B and C	Service included in EPHS fits within a broader category of services included in HBP	Chronic viral hepatitis Acute hepatitis B Hepatitis C virus and Hepatitis B virus (HCV & HBV) complications Tertiary coverage - hepatic

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Hepatitis A and E: Health education on transmission	Service included in EPHS fits within a broader category of services included in HBP	Chronic viral hepatitis Acute hepatitis A Other acute viral hepatitis Tertiary coverage - hepatic
Hepatitis A and E: History		
Hepatitis A and E: Examination		
Hepatitis A and E: Laboratory		
Hepatitis A and E: Treatment		
Dengue: Health Education	Service included in EPHS fits within a broader category of services included in HBP	Dengue fever [classical dengue] Dengue hemorrhagic fever
Dengue: Diagnosis on history and examination		
Dengue: Laboratory		
Dengue: Treatment		
Acute Bronchitis	Service included in EPHS fits within a broader category of services included in HBP	Bronchitis, not specified as acute or chronic
Dysentery	Service included in EPHS fits within a broader category of services included in HBP	Other bacterial intestinal infections
Common cold and cough	Service included in EPHS but not included in HBP	
Typhoid: Diagnosis on history and examination	Service included in EPHS but not included in HBP	
Typhoid: Laboratory	Service included in EPHS but not included in HBP	
Typhoid: Treatment	Service included in EPHS but not included in HBP	
Typhidot	Service included in EPHS but not included in HBP	
Common infections (scabies, pediculosis, helminthiasis): Health education on hand washing/cleanliness, washing infected cloths separately, how infections are transmitted	Service included in EPHS but not included in HBP	
Common infections (scabies, pediculosis, helminthiasis): Management of common infections and wounds	Service included in EPHS but not included in HBP	
Management of fever: History and examination	Service included in EPHS but not included in HBP	
Management of fever: Laboratory	Service included in EPHS but not included in HBP	

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Management of fever: Treatment	Service included in EPHS but not included in HBP	
Management of fever: Refer persistent fever of more than 24 hours; fever > 102F	Service included in EPHS but not included in HBP	
Regular and timely immunization	Service included in EPHS but not included in HBP	
Giving polio drops on all NIDs	Service included in EPHS but not included in HBP	
Participate in campaigns (NIDs)	Service included in EPHS but not included in HBP	
	Service included in HBP but not included in EPHS	Amoebiasis
	Service included in HBP but not included in EPHS	Viral and other specified intestinal infections
	Service included in HBP but not included in EPHS	Viral meningitis
Non-Communicable Diseases		
Chronic Obstructive Pulmonary Disease (COPD)	Service included in EPHS matches service included in HBP	Other chronic obstructive pulmonary disease
Diabetes mellitus: Treatment	Service included in HBP fits within a broader category of services included in EPHS	IDDM insulin therapy refills for a period of one month after discharge
Cancer: Treatment	Service included in HBP fits within a broader category of services included in EPHS	Chemotherapy-per sitting
		Chemotherapy-per sitting plus cost of injections subject to approval for Insurance administrator
		Chemotherapy (Day care or hospitalization)
		Radiotherapy (Day care or hospitalization)
Diabetes mellitus: Health education on diet and avoiding sugar, weight control, regular physical activity 30 minutes a day, regular use of oral hypoglycemic agents/insulin	Service included in EPHS fits within a broader category of services included in HBP	Other specified diabetes mellitus
Diabetes mellitus: History and examination		Unspecified diabetes mellitus
Diabetes mellitus: Laboratory		Insulin-dependent diabetes mellitus
Diabetes mellitus: Treatment		Non-insulin-dependent diabetes mellitus
Diabetes mellitus: Prevention/early detection of diabetic complications		Malnutrition-related diabetes mellitus

Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Asthma: History and examination	Service included in EPHS fits within a broader category of services included in HBP	Asthma
Asthma: Treatment		
Asthma: Referral for severe cases		
Hypertension: Health education and control for BP and prevention of heart attack and strokes: Tobacco cessation, avoiding fats in diet, regular physical activity 30 minutes a day, reduced salt intake <5gm per day, regular use of antihypertensive, weight control	Service included in EPHS fits within a broader category of services included in HBP	Essential (primary) hypertension
Hypertension: History and examination		
Hypertension: Treatment		
Health promotion and education – Hypertension		
Coronary artery disease and stroke: Provide education on treating hypertension, avoiding use of tobacco, avoiding fats and salts, weight control, physical activity	Service included in EPHS fits within a broader category of services included in HBP	Subarachnoid hemorrhage Carotid artery aneurysm Tertiary coverage - cardiopulmonary Acute and subacute endocarditis Other non-traumatic intracranial hemorrhage
Coronary artery disease and stroke: History		
Coronary artery disease and stroke: Examination		
Coronary artery disease and stroke: Treatment		
Coronary artery disease and stroke: Referral for advanced care	Service included in EPHS but not included in HBP	
Health promotion and education: Respiratory problems		
Health promotion and education - Diabetes Mellitus		
Health promotion and education - cancer		
Health promotion and education - mental illnesses		
Health promotion and education - tobacco/smoking control and cessation		
Health promotion and education - weight control		
Health promotion and education - physical activity/exercise		
Self-examination for breast cancer		

Service listed in the EPHS		Degree of alignment between EPHS and HBP	Service listed in the HBP
Cancer: Laboratory		Service included in EPHS but not included in HBP	
Acid peptic disease: History and examination		Service included in EPHS but not included in HBP	
Acid peptic disease: Treatment		Service included in EPHS but not included in HBP	
		Service included in HBP but not included in EPHS	Emphysema
		Service included in HBP but not included in EPHS	Acute tubulo-interstitial nephritis nephritis
		Service included in HBP but not included in EPHS	Other bacterial foodborne intoxications, not elsewhere classified
		Service included in HBP but not included in EPHS	Tertiary coverage - renal
		Service included in HBP but not included in EPHS	Ureteroscopic (URS) Cystolithotomy
		Service included in HBP but not included in EPHS	Acute renal failure
		Service included in HBP but not included in EPHS	Unspecified chronic bronchitis
		Service included in HBP but not included in EPHS	Tertiary coverage - congenital
		Service included in HBP but not included in EPHS	Unspecified chronic bronchitis
Drugs			
None			None
Other			
Other Public Health Interventions	Education concerning prevailing health problems and the methods of preventing and controlling them	Service included in EPHS but not included in HBP	
	Promotion of food supply and proper nutrition	Service included in EPHS but not included in HBP	
	An adequate supply of safe water and basic sanitation	Service included in EPHS but not included in HBP	
	Appropriate treatment of common diseases and injuries	Service included in EPHS but not included in HBP	
	Prevention and control of locally endemic diseases	Service included in EPHS but not included in HBP	

	Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Other Public Health Interventions	Preventative services: Health education, counselling, motivation	Service included in EPHS but not included in HBP	
	Nutrition education, counselling and treatment	Service included in EPHS but not included in HBP	
	Planned health education services at the center and in schools	Service included in EPHS but not included in HBP	
	General treatment services	Service included in EPHS but not included in HBP	
	Referral service	Service included in EPHS but not included in HBP	
	Hygiene promotion, water and sanitation - hand washing with soap, proper toilet use and hand washing practices, problems related to open defecation, advice on safe water techniques, storage and consumption	Service included in EPHS but not included in HBP	
	Balanced diet for adolescents and adults	Service included in EPHS but not included in HBP	
	Health promotion and education - accident/injury prevention	Service included in EPHS but not included in HBP	
	Health promotion and education - rational use of drugs	Service included in EPHS but not included in HBP	
	Health promotion and education - rational use of injections	Service included in EPHS but not included in HBP	
	Mobilizing community to identify severe acute malnutrition/moderate acute malnutrition (SAM/MAM) cases, and seeking health care through LHWs and CMWs	Service included in EPHS but not included in HBP	
	Nutrition behaviors and practices of pregnant women and lactating mothers towards themselves as well as their children	Service included in EPHS but not included in HBP	
	Food diversity	Service included in EPHS but not included in HBP	
	Health promotion on balanced diet for adolescents and adults	Service included in EPHS but not included in HBP	
	Hygiene messages for prevention of transmission of worm infestation	Service included in EPHS but not included in HBP	
	Prevention and management of malnutrition - community level screening of women and children	Service included in EPHS but not included in HBP	

	Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Other Public Health Interventions	Prevention and management of malnutrition - referral to facility after screening at community level	Service included in EPHS but not included in HBP	
	Prevention of malnutrition - prevent parasitic infections	Service included in EPHS but not included in HBP	
	Promote exposure to sunshine for women and children to avoid vitamin D deficiency	Service included in EPHS but not included in HBP	
	Prevention of malnutrition - promotion of iodized salt	Service included in EPHS but not included in HBP	
	Identification and treatment of anemia in women and children	Service included in EPHS but not included in HBP	
	Disaster preparedness e.g., earthquake, flood: Saving lives through basic life support/CPR	Service included in EPHS but not included in HBP	
	Disaster preparedness e.g., earthquake, flood: Educating people on coping with emergencies	Service included in EPHS but not included in HBP	
Emergency Care	Snake bites	Service included in EPHS matches service included in HBP	Snake bite
	Maintain airway, circulation and breathing	Service included in EPHS but not included in HBP	
	Diagnosis and management of common medical emergencies, e.g., bleeding, choking and loss of consciousness	Service included in EPHS but not included in HBP	
	Minor cuts/injuries	Service included in EPHS but not included in HBP	
	Fractures/dislocations	Service included in EPHS but not included in HBP	
	Sprains/strains	Service included in EPHS but not included in HBP

	Chemical exam: Albumin (quantitative)	Service included in EPHS but not included in HBP	
	Chemical exam: Glucose (qualitative)	Service included in EPHS but not included in HBP	
	Chemical exam: Glucose (quantitative)	Service included in EPHS but not included in HBP	
	Microscopic (stool test)	Service included in EPHS but not included in HBP	
	Blood sugar	Service included in EPHS but not included in HBP	
	Urea	Service included in EPHS but not included in HBP	
Total protein	Service included in EPHS but not included in HBP		

	Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
	X-rays	Service included in EPHS but not included in HBP	
	Ultrasound	Service included in EPHS but not included in HBP	
Dental Services	Dental pain/caries/other problems: Tooth extraction	Service included in EPHS matches service included in HBP	Extraction of tooth including local anesthetic Complicated extraction per tooth including local anesthetic
	Dental pain/caries/other problems: Treatment	Service included in HBP fits within a broader category of services included in EPHS	Apsectomy including local anesthetic Flap operation per tooth Impacted molar including local anesthetic (LA)
	Dental pain/caries/other problems: Examination	Service included in HBP fits within a broader category of services included in EPHS	Intra oral X-ray
	Management of gingivitis and oral ailments	Service included in HBP fits within a broader category of services included in EPHS	Gingivectomy per tooth
	Health education on dental care: Dental cleaning twice a day, using floss, healthy diet, seeking advice early, dental related disorders (hepatitis, CV disorders, diabetes)	Service included in EPHS but not included in HBP	
	Dental pain/caries/other problems: History	Service included in EPHS but not included in HBP	
	Dental pain/caries/other problems: Scaling	Service included in EPHS but not included in HBP	
	Dental pain/caries/other problems: Filling	Service included in EPHS but not included in HBP	
ENT	Treatment of otitis media	Service included in EPHS but not included in HBP	
	Referral for complicated cases	Service included in EPHS but not included in HBP	
		Service included in HBP but not included in EPHS	Removal of foreign body from trachea or esophagus
		Service included in HBP but not included in EPHS	ENT surgical services (see package list for more details)

	Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Ophthalmology	Detection of cataract cases and referral for surgery	Service included in HBP fits within a broader category of services included in EPHS	Cataract + Pterygium
			Cataract with IOL by Phoco emulsification tech. unilateral
			Cataract with IOL with Phoco emulsification bilateral
			Cataract bilateral
			Cataract unilateral
	Referral for suspected glaucoma	Service included in EPHS fits within a broader category of services included in HBP	Glaucoma surgery (trabeculectomy)
Diagnosis and treatment of common eye diseases	Service included in EPHS fits within a broader category of services included in HBP	Ophthalmology surgical services (see package list for more details)	
Visual acuity using Snellen chart	Service included in EPHS but not included in HBP		
Treatment of trachoma	Service included in EPHS but not included in HBP		
Other	Identification/referral for: Physical disability, visual impairment, hearing disability	Service included in HBP fits within a broader category of services included in EPHS	Ophthalmology and ENT surgical services (see package list for more details)
	Health education on: Acknowledging a mental problem, actions to be taken	Service included in EPHS but not included in HBP	
	Attention deficit disorder	Service included in EPHS but not included in HBP	
	Generalized anxiety disorder	Service included in EPHS but not included in HBP	
	Depression/postpartum depression: drug abuse	Service included in EPHS but not included in HBP	
	Depression/postpartum depression: treatment of epilepsy; referral for advanced management	Service included in EPHS but not included in HBP	
	Disability prevention and rehabilitation services: refer for seeking advice on Rehabilitation Services including physical and occupational therapy	Service included in EPHS but not included in HBP	
	Disability prevention and rehabilitation services: refer for making life of disabled productive/vocational therapy	Service included in EPHS but not included in HBP	

	Service listed in the EPHS	Degree of alignment between EPHS and HBP	Service listed in the HBP
Other	Control for iodine deficiency: health education about illnesses due to iodine deficiency	Service included in EPHS but not included in HBP	
	Control for iodine deficiency: identification of goitre and referral	Service included in EPHS but not included in HBP	
		Service included in HBP but not included in EPHS	General Ward-ICU
		Service included in HBP but not included in EPHS	Non-surgical
		Service included in HBP but not included in EPHS	Trigger thumb
		Service included in HBP but not included in EPHS	General Ward-Unspecified
		Service included in HBP but not included in EPHS	EKG/EOG
		Service included in HBP but not included in EPHS	Urethral injury
		Service included in HBP but not included in EPHS	Tertiary coverage - Adult
		Service included in HBP but not included in EPHS	Tertiary coverage - medical and surgical management requiring hospitalization
		Service included in HBP but not included in EPHS	Other surgical services (see package list for more details)

About HFG:

A flagship project of USAID's Office of Health Systems, the Health Finance and Governance (HFG) project supports its partners in low- and middle-income countries to strengthen the health finance and governance functions of their health systems, expanding access to life-saving health services. The HFG project is a six-year (2012-2018), \$209 million global health project. The project builds on the achievements of the Health Systems 20/20 project. To learn more, please visit www.hfgproject.org.

The HFG project is led by Abt Associates in collaboration with Avenir Health, Broad Branch Associates, Development Alternatives Inc., Johns Hopkins Bloomberg School of Public Health, Results for Development Institute, RTI International, and Training Resources Group, Inc.
