# **Health Governance: Building a Strategic Approach to Evidence**

**Jodi Charles**  
**Office of Health Systems**

# Strategic priorities for core health system functions

**Overall goal: Improve health systems capacity and effectiveness in governance to support improved delivery of high quality and equitable health services**

## **Objectives:**

- ❑ Develop sustainable country capacity in transparent and accountable policy, planning and management to advance EPCMD and AFG goals in national agenda**
- ❑ Build capacity of civil society and private sector for stronger voice and better advocacy to increase government transparency and accountability**
- ❑ Improved government effectiveness and responsiveness, including stewardship and regulatory capacity, to support improved health service delivery**
- ❑ Develop a new generation of health system leaders at country, regional and community levels**

## Priority questions to pursue in achievement of these objectives:

- ❑ **What are the most effective interventions in developing sustainable country capacity to develop national-level policies, plans, and management strategies to advance EPCMD and AFG?**
- ❑ **What are the most cost-effective, high-impact interventions that contribute to strengthening the voice of civil society and the private sector for enhancing government transparency and accountability?**
- ❑ **What is the role of stewardship and regulation in improving health service delivery for EPCMD and AFG?**
- ❑ **What are the most cost-effective, high impact strategies for developing the next generation of health system leaders?**

## Today's Objectives:

- Identify a common threshold for research and range of evidence among health and governance**
- Identify evidence gaps and priority research questions**
- Identify actionable ways to move the evidence agenda forward by linking priority questions with existing mechanisms and on-going or future activities.**

Thank you!
